Logic model template

Map inputs, activities, outputs and outcomes on one page.

A logic model shows how your resources lead to results. Many funders ask for one, and it keeps the proposal, budget and evaluation consistent.

Inputs	Activities	Outputs	Short-term outcomes	Long-term outcomes
[Staff, volunteers, funding, partners, facilities]	[What you will do]	[Counts: sessions held, people reached]	[Changes in knowledge, skills or access within the grant period]	[Lasting change you contribute to]
[ ]	[ ]	[ ]	[ ]	[ ]

Assumptions

[What must be true for this to work, for example partner referrals continue.]

External factors

[Things outside your control that could affect results.]

How you will measure it

Outcome	Indicator	Data source	When collected
[Outcome]	[Indicator]	[Survey, records]	[Timing]
